UPSLOPE CAPITAL MANAGEMENT

2026-Q3 Update **October 20, 2026**

Dear Fellow Investor,

Upslope's objective is to deliver attractive, equity-like returns with significantly reduced market risk and low correlation versus traditional equity strategies. In a challenging environment for defensive, value-oriented strategies, the Fund delivered solid absolute and strong relative performance in Q3, owing largely to the announced acquisition of MarketAxess.

Q3 marked the 10-year anniversary of Upslope's strategy. With returns since inception ahead of its longstanding benchmarks – and just over half the downside volatility of the midcap index – Upslope has met its stated objective. I am pleased, but not content with the results**.** Upslope's core principles have evolved slowly and deliberately over the past decade. My commitment to remaining disciplined, regardless of market narratives and fashions, has not.

	Upslope Exposure & Returns[1]		Benchmark Returns	
	Average Net Long[2]	Net Return	S&P Midcap 400 ETF (MDY)	HFRX Equity Hedge Index
Q3 2026	36%	+2.2%	-6.4%	-1.7%
YTD 2026	34%	+3.6%	+9.7%	+6.8%
Last 12 Months	34%	+5.7%	+11.4%	+8.6%
Since Inception	**36%**	**+10.2%**	**+10.0%**	**+5.6%**
Downside Deviation		*6.8%*	*12.3%*	*4.7%*
Sortino Ratio[3]		**1.19**	**0.65**	**0.77**

Note: LPs/clients should always check individual statements for returns, which may vary due to timing, fee schedules and other factors. Since inception returns, downside deviation, and Sortino are all annualized figures.

MARKET CONDITIONS – 'THE SOUND OF SILENCE'

I have unusually little to add to the discourse around equity market conditions, which are driven at the index level largely by the fate of the "AI trade." Mostly, I spent the last quarter trying to reduce this thematic exposure (long *and* short) in Upslope's portfolio. This was harder than it sounds, given my own biases as well as the breadth of these narratives. The "AI trade" is not Upslope's game and the fact it has consumed markets has led to big opportunities in areas Upslope has deep experience navigating. This requires focus.

Like Q2, Upslope's portfolio remains concentrated in stocks that are cheap, defensive, and executing well. What's new: several smaller longs (mostly undisclosed "Starters") that are also cheap and higher quality, but cyclical. Despite markets being perched not far from all-time highs, these companies appear to be near their own cyclical troughs and could graduate to larger position sizes if fundamentals progress.

Headline portfolio changes in Q3 were modest. The most notable addition: Intercontinental Exchange (a leading derivatives exchange operator and mortgage tech platform), which itself is acquiring prior Upslope holding MarketAxess. Exchanges broadly fell out of favor earlier this year, despite strong operating results and a supportive environment. So, Upslope is now long two of the leading operators. More details follow.

[1] See important performance-related details and disclosures in Appendix A.
[2] Beta-/delta-adjusted.
[3] Calculated as: (Net return since inception - 2.0% risk-free rate) / downside deviation.

PORTFOLIO POSITIONING

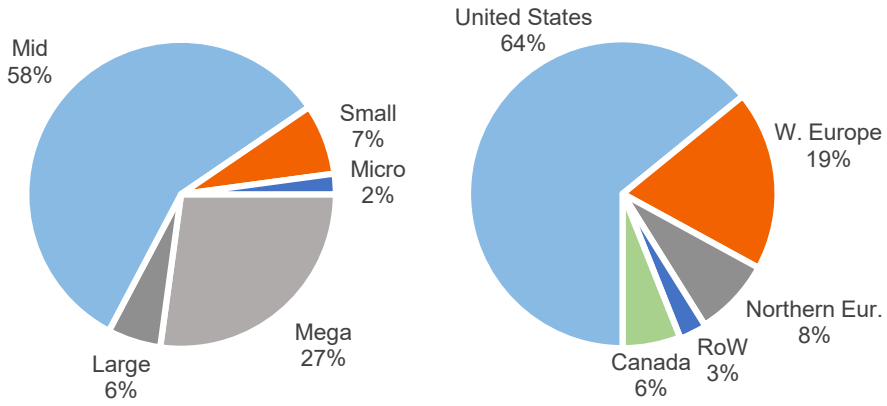

As of this writing, gross and beta-adjusted net exposures were 156% and 25%, respectively. Positioning reflects a higher number of perceived short opportunities, as well as the lower beta nature of many top longs. Gross remains elevated above the Fund's typical 150% ceiling due to certain hedged positions.

Exhibit 1: Portfolio Snapshot

NAME	TICKER	INDUSTRY	HQ	MCAP ($B)
Core Longs (28% of Total Gross Exposure)				
CME Group	CME	Investment Banks/Brokers	United States	$94.1
Intercontinental Exchange	ICE	Investment Banks/Brokers	United States	85.3
Teledyne Technologies	TDY	Aerospace & Defense	United States	28.1
STERIS	STE	Medical Specialties	United States	20.5
Diploma	DPLM-GB	Wholesale Distributors	United Kingdom	13.8
Smiths Group	SMIN-GB	Electrical Products	United Kingdom	11.0
Tactical Longs (25%)				
Crown Holdings	CCK	Containers/Packaging	United States	$11.8
Magnum Ice Cream Co.	MICC	Food: Meat/Fish/Dairy	Netherlands	10.9
Kesko	KESKOB-FI	Food Retail	Finland	10.5
Henry Schein	HSIC	Medical Distributors	United States	9.4
FTI Consulting	FCN	Miscellaneous Commercial Services	United States	3.7

Exhibit 2: Gross Exposure by Market Cap & Geography (HQ)

Note: as of 10/19/26. Market cap ranges: Micro (<$500mm), Small ($500mm - $2bn), Mid ($2bn - $25bn), Large ($25bn - $50bn), Mega (>$50bn). Source: Upslope, Interactive Brokers, FactSet

PORTFOLIO UPDATES

The largest individual contributors to and detractors from quarterly performance are noted below. Gross contribution to overall portfolio return is noted in parentheses.

Exhibit 3: Top Contributors to Quarterly Performance (Gross)

Top Contributors	Top Detractors
Long: MarketAxess (+430 bps)	Long: FTI Consulting (-175 bps)
Short: Financial (+175)	Long: Teledyne (-80)
Long: Tecan (+160)	Long: Intercontinental Exchange (-65)
Longs – Total Contribution	**Shorts – Total Contribution**
+380 bps	-95 bps

Source: Upslope, Opus Fund Services, Interactive Brokers
Note: Amounts may not tie due to rounding. Total net performance during above period: +2.2%.

Key Exits

Upslope exited **MarketAxess** (MKTX, leading fixed income "exchange" operator) in the quarter due to its announced acquisition by Intercontinental Exchange. Upslope also effectively exited **Alphabet** (GOOGL, Google parent company) due to full valuation and Upslope's (portfolio hedge) thesis having played out.

Additionally, the Fund exited **Lifco** (LIFCO.B-SE, Sweden-based specialty industrial and dental serial acquiror) and **Korea Defense Industry ETF** (KDEF). In both cases, exits were mostly due to lower relative conviction as opposed to thesis breaks.

New Long – Intercontinental Exchange (ICE)

Intercontinental Exchange is a leading global operator of derivative, equity and fixed income exchanges, as well as a mortgage technology provider. ICE is a major peer of CME, which Upslope also owns; however, its granular product mix is somewhat complementary, and their competition is less direct than one might expect. By segment, ~55% of net revenue comes from Exchanges (including the New York Stock Exchange, as well as major futures markets for global energy and European interest rates), 25% from Fixed Income & Data Services, and 20% from Mortgage Tech. About 35% of revenue comes from outside the U.S. (mostly Europe).

While I've followed ICE for 15+ years, some recent developments piqued my interest in becoming a shareholder for the first time:

(1) Noise around perpetual futures and a general disdain by the market of late for economically defensive businesses have contributed to a decline in ICE's valuation. Despite this, ICE's core exchange business remains attractive and defensive, with deep competitive advantages.

(2) ICE's Mortgage Tech segment, which automates the lifecycle of a mortgage and touches ~90% of U.S. mortgages, is operating in trough-like conditions. While a majority of segment revenues are genuinely recurring in nature (e.g. tied to existing mortgage servicing), roughly 45% come from origination and closing products that should benefit in a housing recovery. This dynamic complements Upslope's portfolio well.

(3) The company's announced acquisition of MarketAxess represents an attractive valuation for a business that could see notable improvement and value creation under ICE ownership. While not the most important leg of (or even essential to) Upslope's thesis, it's what put ICE back on Upslope's radar.

(4) Shares de-rated from a post-GFC peak of ~20x EBIT to 14x, while the balance sheet remains in solid shape even accounting for the MKTX acquisition (~3x net levered). In 2025, ICE delivered its 20th consecutive year of record net revenues. For a defensive business with such a solid growth track record, a key segment underearning, and a pending acquisition providing optionality, the current risk/reward appears asymmetric.

Key risks for the company and shares include: uncertainty over perpetual futures development and regulation, prolonged housing slump, MarketAxess integration/execution/competition, general risks related to trading technology, and management's historically above-average appetite for larger, transformative acquisitions.

New Long – Tecan (TECN-CH)

Based in Switzerland, Tecan is a leading provider of premium automated liquid handling equipment, consumables, and services for labs around the world. Upslope was a shareholder in prior years and continued to track the business as it navigated a brutal post-COVID cyclical downturn. In Q3, Upslope began purchasing shares for <25x cyclically depressed earnings, or ~2x EV/sales (vs. more normalized valuation of ~3-4x sales). The company appears to be in the early innings of exiting its cyclical downturn, as sales and earnings revisions have finally stabilized. Given that shares re-rated quickly and sharply after Upslope re-established the position, the Fund's position has already been reduced back to a modest "Starter"-sized level.

CLOSING THOUGHTS

2026 has been a challenging year with an unusual amount of up and down violence at the single stock and portfolio level. The portfolio has been streamlined, and current positioning feels far more balanced than usual. I am confident that the portfolio's construction and positions should enable Upslope to successfully navigate volatile markets ahead.

Thank you, as always, for the trust you've placed in me. Please contact me if you have any questions, would like to add to your investment, or know a qualified investor who may be a good fit for Upslope's approach.

Sincerely,

George K. Livadas

Thereafter, PM managed the strategy/accounts on a no-fee basis through August 11, 2017, after which Upslope became operational. **PAST PERFORMANCE IS NO GUARANTEE OF FUTURE RESULTS.**

Appendix B: Portfolio Company (Long) Descriptions[4]

CME Group (CME): Leading operator of global derivatives exchanges; focused on rates, commodities, equities and FX. Attractive, durable business with deep competitive advantages that should continue to benefit from sustained global macro volatility.

Crown Holdings (CCK): One of the leading global aluminum beverage can producers, with strong geographic diversification. Decade-low leverage and valuation (on EV) provide an attractive entry point for a company operating well in an out of favor staples-like sector.

Diploma (DPLM-LON): U.K.-based specialty distributor focused on essential consumable products across life sciences, seals (machinery), and controls (aerospace wiring/harnesses). Unique model and conservative M&A strategy have historically enabled attractive free cash flow growth through the cycle.

FTI Consulting (FCN): Boutique consulting and advisory firm, with deep experience in restructuring, dispute/conflict advisory, and other practices. Challenges in a non-core segment and concerns over AI disruption have depressed expectations for shares despite an environment that should ultimately lead to strong and rising demand.

Henry Schein (HSIC): Largest national distributor of dental products, as well as general healthcare supplies. Recent investment from KKR, along with long-time CEO transition, appears likely to accelerate efficiency improvements and revenue growth, while maintaining take-private optionality.

Intercontinental Exchange (ICE): Leading operator of global financial exchanges and mortgage technology platforms. Trough-like conditions in mortgage technology segment provide potential cyclical upside, while core exchange business should continue to benefit from sustained global macro volatility.

Kesko (KESKOB-FI): Uniquely diversified business spanning grocery, building products and auto dealers. Large, defensive grocery business (#2 share in consolidated Finnish market) enables management to allocate capital more aggressively during regional cyclical downturn in building products, as competitors retrench.

Magnum Ice Cream Co (MICC): Recently spun out of Unilever and is the largest pure-play global ice cream company. New standalone focus creates opportunity to accelerate growth and expand margins in a defensive sector that's deeply out of favor in public markets.

Smiths Group (SMIN-LON): Historically sleepy UK-based industrial conglomerate focused on specialty industrial niches and, previously, security/detection. Activist pressure led to the company shedding non-core units. "New Smiths" is now higher quality and cyclically well-positioned, given exposure to energy infrastructure.

STERIS (STE): Leader in infection prevention, sterilization, and procedural solutions for healthcare providers, hospitals, pharmaceutical & bioprocess customers, and medical-device makers. Strong historic organic growth, with a majority of sales from recurring services and consumables.

Teledyne Tech. (TDY): Producer of specialty electronics, components, and technologies – primarily focused on imaging sensors and cameras. Dinged by transformative 2021 FLIR acquisition, expectations and valuation reset, balance sheet is clean, and the company is positively exposed to rising defense spending, reshoring and physical AI.

[4] "Starter" long positions not shown.

Appendix C: Terminology

Core Longs: Higher "quality" businesses (defined as low cyclicality, clean balance sheet, obvious and durable competitive advantages) managed with less valuation sensitivity (i.e. typically won't exit a Core long solely because of valuation) and assuming a multi-year time horizon.

Tactical Longs: Traditional "value" investments of more modest quality (reasonably or very cyclical, currently experiencing operational, competitive or financial challenges) managed with greater valuation sensitivity (i.e. typically begin to exit if shares approach full valuation) and assuming a shorter time horizon (typically 6-18 months).

Starter Longs: Generally smaller, undisclosed longs that fall into at least one of the following groups:

1. Ideas where I've completed enough work to establish a toehold, but still have more to do.
2. Companies facing obvious short-term challenges where I believe the near-term path in shares is likely lower, but the stock is 'cheap enough' and outright attractive over the longer-term.
3. 'Counter-shorts' – higher-beta longs with good risk/reward that trade more in-sync with Upslope's shorts on a daily basis and can be used to manage overall net long exposure more effectively and tax-efficiently.

Alpha Shorts: Individual company short positions.

Hedges: Diversified index hedges (either long or short).

IMPORTANT DISCLOSURES

General

Upslope Capital Management, LLC ("Upslope") is a Colorado registered investment adviser. Information presented is for discussion and educational purposes only. This presentation is not an offer to sell securities of any investment fund or a solicitation of offers to buy any such securities. Securities of the fund managed by Upslope are offered to selected investors only by means of a complete offering memorandum and related subscription materials which contain significant additional information about the terms of an investment in the fund (such documents, the "Offering Documents"). Any decision to invest must be based solely upon the information set forth in the Offering Documents, regardless of any information investors may have been otherwise furnished, including this presentation. Investments involve risk and, unless otherwise stated, are not guaranteed.

The information in this presentation was prepared by Upslope and is believed by Upslope to be reliable and has been obtained from public sources believed to be reliable. Upslope makes no representation as to the accuracy or completeness of such information. Opinions, estimates and projections in this presentation constitute the current judgment of Upslope and are subject to change without notice. Any projections, forecasts and estimates contained in this presentation are necessarily speculative in nature and are based upon certain assumptions. It can be expected that some or all of such assumptions will not materialize or will vary significantly from actual results. Accordingly, any projections are only estimates and actual results will differ and may vary substantially from the projections or estimates shown. This presentation is not intended as a recommendation to purchase or sell any commodity or security. Upslope has no obligation to update, modify or amend this presentation or to otherwise notify a reader thereof in the event that any matter stated herein, or any opinion, projection, forecast or estimate set forth herein, changes or subsequently becomes inaccurate.

The graphs, charts and other visual aids are provided for informational purposes only. None of these graphs, charts or visual aids can in and of themselves be used to make investment decisions. No representation is made that these will assist any person in making investment decisions and no graph, chart or other visual aid can capture all factors and variables required in making such decisions.

This presentation is strictly confidential and may not be reproduced or redistributed in whole or in part nor may its contents be disclosed to any other person without the express consent of Upslope.

Investment Strategy

The description herein of the approach of Upslope and the targeted characteristics of its strategies and investments is based on current expectations and should not be considered definitive or a guarantee that the approaches, strategies, and investment portfolio will, in fact, possess these characteristics. In addition, the description herein of the fund's risk management strategies is based on current expectations and should not be considered definitive or a guarantee that such strategies will reduce all risk. These descriptions are based on information available as of the date of preparation of this document, and the description may change over time. Past performance of these strategies is not necessarily indicative of future results. There is the possibility of loss and all investment involves risk including the loss of principal.

The investment targets described in this presentation are subject to change. Upslope may at any time adjust, increase, decrease or eliminate any of the targets, depending on, among other things, conditions and trends, general economic conditions and changes in Upslope's investment philosophy, strategy and expectations regarding the focus, techniques, and activities of its strategy.

Portfolio

The investments or portfolio companies mentioned, referred to, or described are not representative of all investments in vehicles or SMAs managed by Upslope and there can be no assurance that the investments will be profitable or that other investments made in the future will have similar characteristics or results. Past performance of Upslope's investment vehicles, investments, or investment strategies are not necessarily indicative of future results. Investors should be aware that a loss of investment is possible. No representation is being made that similar profits or losses will be achieved.

Performance Results

Performance results presented are for information purposes only and reflect the impact that material economic and market factors had on the manager's decision-making process. No representation is being made that any investor or portfolio will or is likely to achieve profits or losses similar to those shown.

Performance results are shown for the Fund's Class A interests net of all fees, including management and incentive, Fund operating expenses, as well as all trading costs charged by the custodian, to the investor. Historical SMA composite performance calculations (inception – May 2023) have been independently verified by LICCAR, LLC. Subsequent returns based on Fund performance data from Opus Fund Services. Performance of individual investors may vary based upon differing management fee and incentive allocation arrangements, the timing related to additional client deposits or withdrawals and the actual deployment and investment of a client portfolio, the length of time various positions are held, the client's objectives and restrictions, and fees and expenses incurred by any specific individual portfolio. Performance estimates are subject to future adjustment and revision. The information provided is historical and is not a guide to future performance. Investors should be aware that a loss of investment is possible.

This presentation cannot and does not guarantee or predict a similar outcome with respect to any future investment. Upslope makes no implications, warranties, promises, suggestions or guarantees whatsoever, in whole or in part, that by participating in any investment of or with Upslope you will experience similar investment results and earn any money whatsoever.

Indices Comparisons

References to market or composite indices, benchmarks, or other measures of relative market performance over a specified period of time are provided for information only. Reference or comparison to an index does not imply that the portfolio will be constructed in the same way as the index or achieve returns, volatility, or other results similar to the index.

Indices are unmanaged, include the reinvestment of dividends and do not reflect transaction costs or any performance fees. Unlike indices, Upslope's investments will be actively managed and may include substantially fewer and different securities than those comprising each index. Upslope's performance results as compared to the performance of HFRX Equity Hedge Index and S&P Midcap 400 (ticker: MDY) are for informational purposes only. HFRX Equity Hedge Index is an index that maintains positions both long and short in primarily equity and equity derivative securities. S&P Midcap 400 (ticker: MDY) is a stock market index that serves as a gauge for the U.S. mid-cap equities sector.

The investment program of Upslope does not mirror the indices and the volatility may be materially different than the volatility of the indices. Direct comparisons between Upslope's performance and the aforementioned indices are not without complications. The indices may be unmanaged, may be market weighted, and indices do not incur fees and expenses. Due to the differences among the portfolios of Upslope and the aforementioned indices, no such index is directly comparable to Upslope.

Fund Terms

The summary provided herein of the terms and conditions of the fund managed by Upslope does not purport to be complete. The fund's Offering Documents should be read in its entirety prior to an investment in the fund.
